Okean 80

UNFOLD YOUR MIND

AWARDED AS "REVELATION OF THE YEAR" AT WORLD YACHTS TROPHIES 2020, IN CANNES, THE NEW OKEAN 80 IS IN FACT A YACHT WORTHY OF ALL ATTENTION THAT IT'S BEEN RECEIVING AROUND THE WORLD! MODERN DESIGN, SPACE AND ATTENTION TO DETAILS ARE JUST SOME OF THE CHARACTERISTICS THAT MAKE OKEAN'S FLAGSHIP A WORLDWIDE SUCCESS

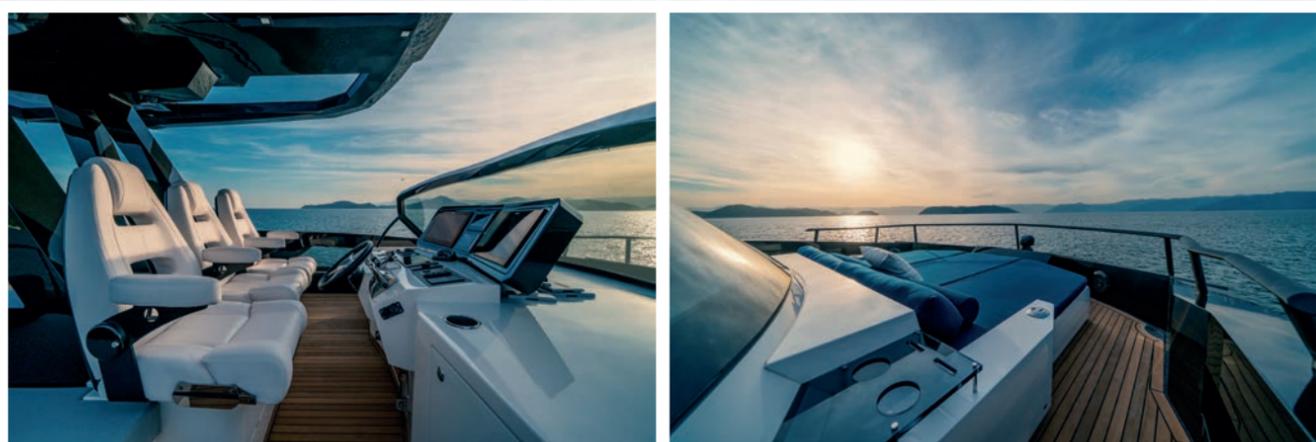

By Cristiane Bartel

The concept behind its design, created by Paolo Ferragni, designer responsible for the creation of the entire Okean line, was developed around the arrangements of the decks and the innovative use of space, creating a variety of spaces for leisure and socializing. As a result, Okean 80 provides different types of experiences, appealing to various types of yachtmen. The main deck is all on the same level, merging the salon and aft deck, which gives an even greater feeling of spaciousness once the sliding glass doors are fully open.

The aft deck offers a lounge with a dining table and access to the stern from both sides. In this space a beach club can be set up, something rarely seen on yachts in this size range. A rear door opens to reveal a sofa and two armchairs which can accommodate guests in this area, and this same door still serves as a cover for those who prefer not to be under direct sunlight. Towards the bow, the wide walkways offer safety while walking around the yacht. The front area of Okean 80 has another inviting space for lounging or even for a more relaxed lunch under a large bimini as upon request.

Of all of the external areas, one of the biggest highlights of the yacht is certainly the huge flybridge; it has a total width of the beam and a generous 48.5 m². It emphasizes the Okean 80's open-air philosophy and can be divided into five separate areas, with a large lounging area, a full wet bar with sink and refrigerator, a large covered dining table, and the central helm station towards the bow. On the flybridge there are also three adjustable helm seats. This arrangement provides a comfortable separation of spaces, giving more privacy. To the front of the vessel, there is another spacious solarium to sunbathe and enjoy the day.

A strong interaction with the surroundings can also be seen in the interior design, which is characterized by sophisticated furniture set in an essential style, with simple geometries that maximize its volumes. The available space is used to its full extent and offers the greatest possible comfort for all those aboard. Additionally, Okean's new construction arrangements have allowed to optimize production times by using the latest yacht building materials and technology available in the industry. Last but not least, the use of cutting-edge materials has made it possible to significantly reduce the total weight of the vessel.

The main salon is a special part of the yacht, because, in addition to providing a 360° view, it can also be customized to the owner's taste. The arrangement admits several forms, bringing the chairs to the outside, for example, creating another comfortable and cozy atmosphere in the balconies.

With large windows and fold-out balconies, the interior spaces dissolve and are absorbed by the natural environment

Different owners have different needs, with that in mind Okean 80 was designed so that it can have a 3 or 4-cabin layout. The first Okean 80 offers four staterooms, one of which can be converted into a home theater. There is also an additional bathroom for day use. The master cabin is impressively large and the owners can enjoy a home like space – spacious, open and, above all, full of day light thanks to the large panoramic windows in the hull sides. The VIP cabin follows the same principle and also has this feeling of spaciousness. Meanwhile, the crew cabin is also on the lower deck, but has a separate access, giving guests more privacy; it can accommodate up to three crew members with a crew galley.

“The Okean 80 has a fantastic navigation, extremely solid and steady, and can sail at 26 knots at full speed. She is a limousine!”

(Luis Henrique Ferreira)

In addition to all the design details, Okean also focused on all the technology embedded in the 80-foot yacht, ranging from the construction of the hull and the chosen propulsion, to the navigation equipment. Okean's hull is designed with the Dual Mode system, which allows a smooth transition between displacement, rapid displacement and planing modes. State-of-the-art raw materials, such as Kevlar and carbon fiber, provide resistance to the hull and also reduce fuel consumption.

“The Okean 80 has a fantastic navigation, extremely solid and steady, and can sail at 26 knots at full speed. She is a limousine!”, says Luis Henrique Ferreira, marketing director at Okean Yachts.

The yacht is equipped with twin engines MAN 1550 HP, and according to the shipyard, at a speed of 18 knots, it has a range of 300 nautical miles. To further improve vessel stability, Okean 80 is equipped with a Seakeeper gyro stabilizer.
